

## ATS22C25S6U

mekiupuštač–ATS22–uprav.110V–snaga208V  
(75ks)/230V(100ks)/460V(200ks)/575V(250ks)

### Glavno

|                              |   |
|------------------------------|---|
| Range of product             | Altistart 22  |
| Product or component type    | Soft starter  |
| Product destination          | Asynchronous motors   |
| Product specific application | Pumps and fans  |
| Component name               | ATS22   |
| Network number of phases     | 3 phases  |
| [Us] rated supply voltage    | 208...600 V - 15...10 %   |
| Motor power hp               | 100 hp 230 V<br>200 hp 460 V<br>250 hp 575 V<br>75 hp 208 V         |
| Factory setting current      | 240 A   |
| Power dissipation in W       | 129 W for standard applications                                     |
| Utilisation category         | AC-53A  |
| Type of start                | Start with torque control (current limited to 3.5 In)               |
| IcL starter rating           | 250 A connection in the motor supply line for standard applications |
| IP degree of protection      | IP00  |

### Komplementarno

|                              |  |
|------------------------------|--|
| Assembly style               | With heat sink   |
| Function available           | Internal bypass  |
| Supply voltage limits        | 177...660 V  |

## Frame Size D

### Dimensions

## Precautions

### Standards

The Altistart 22 soft starter is compliant with pollution Degree 2 as defined in NEMA ICS1-1 or IEC 60664-1.

For environment pollution degree 3, install the Altistart 22 soft starter inside a cabinet type 12 or IP54.

### **⚠ DANGER**

#### **HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH**

ATS22 soft starters are open devices and must be mounted in a suitable enclosure.

**Failure to follow these instructions will result in death or serious injury.**

### Air Circulation

Leave sufficient free space to help the air required for cooling purposes to circulate from the bottom to the top of the unit.

### Overheating

To avoid the soft starter to overheat, respect the following recommendations:

- 1 Mount the Altistart 22 Soft Starter within  $\pm 10^\circ$  of vertical.
- 1 Do not locate the Altistart 22 Soft Starter near heat radiating elements.
- 1 Electrical current through the Altistart 22 Soft Starter will result in heat losses that must be dissipated into the ambient air immediately surrounding the soft starter. To help prevent a thermal fault, provide sufficient enclosure cooling and/or ventilation to limit the ambient temperature around the soft starter.
- 1 If several soft starters are installed in a control panel, arrange them in a row. Do not stack soft starters. Heat generated from the bottom soft starter can adversely affect the ambient temperature around the top soft starter.

## Wall mounted or Floor-standing Enclosure with IP 23 Degree of protection

### Introduction

To help proper air circulation in the soft starter, grilles and forced ventilation can be installed.

### Ventilation Grilles

### Forced Ventilation Unit

## Power Terminal
